OPERATING INSTRUCTIONS

WELCOME TO THE WINTON FAMILY

Thank you for buying a Winton watch, and we hope you enjoy wearing it for many years to come.

There are many watch brands, both established and new, all competing for your business, so we do appreciate you Defying Convention and Standing Out from the crowd as is the Winton ethos.

Your Winton watch is hand made in Switzerland with premium quality components, such as sapphire glass crystals and automatic movements, and is covered by a two-year international guarantee against manufacturing defects.

We have exciting plans for The Winton Watch Company over the next few years, please keep an eye on our website at www.winton.watch for developments we and look forward to you expanding your collection or introducing the Winton Watch brand to friends and family.

WINTON SWAN

The Swan's classic design is for those people who want more of a traditional dress watch, but one that can withstand the rigours of adventure, when needed.

Hand assembled in Switzerland and water resistant to 100m, with sapphire glass, it will take pretty much anything you care to throw at it, yet be smart and discrete enough to wear at a black-tie dinner.

Silver hour markers and 'arrow' pointers contrast with the white 'semi pie pan' dial to offer an understated look, yet make it easy to tell the time at a glance.

The Swan is a modern, yet classic watch, that celebrates the pioneering work of Joseph Swan.

SPECIFICATION

- Brushed stainless steel case, with polished accents
- Arctic White semi pie pan dial
- 39mm diameter
- Sapphire glass
- Stainless steel bracelet
- Applied hour markers
- 'Arrow' pointers
- Sweep second hand
- Date marker
- Exhibition case back with sapphire glass
- Up to 100m water resistance

MOVEMENT

- ETA 2824-2
- Swiss-made automatic mechanical movement
- 28,800 beats per hour
- 25 jewels
- 42-hour power reserve
- Incabloc anti-shock system
- Hours, minutes, central sweeping seconds, date

WHO WAS JOSEPH SWAN?

Born in 1828 in Sunderland, Joseph Swan is an English physicist, chemist, and inventor.

He was an independent early developer of an incandescent lightbulb and owned the first home in the world to be illuminated by electricity. His bulbs were also used in the Savoy Theatre, London – the first public building in the world lit entirely by electricity – as well by the Royal Navy and in a safety lamp for miners.

Often overshadowed by the work of rival, then business partner, Thomas Edison, Swan was a true pioneer.

At Winton we celebrate unsung British pioneers, which is why the Swan has joined our portfolio.

I N S T R U C T I O N S

POS. 1 Position of rest (*watch running*)

Winding while stopped

The maximum power reserve can be restored by turning the crown clockwise around 30 times.

POS. 2 Quick-change correction for date

- Pull the crown out to position 2 (*watch still running*).
 - Turn the crown anti-clockwise until required date appears.
 - Push the crown back to position 1.
-

POS. 3 Setting the time

- Pull the crown out to position 3 (*watch stopped*)
- Turn the crown until the current time is displayed (*remember the 24hr cycle*).
- Push the crown back to position 1.
